INTRODUCTION: The USA Taekwondo Poomsae Athletes' Reference Guide provides support for USA Taekwondo (USAT) poomsae athletes who are in development for national and international competition. The guide is comprised of the significant aspects of the most current information sources available. It includes the following sections: Compulsory Poomsae, Competition Format, Event Procedure, General Technical Guidelines, Detailed Technical Guidelines, and Deductions.

Age divisions are based on the year, rather than the date, of the event. For example, a competitor who has her 19th birthday on December 2, 2012, will compete in the 1st Senior Division at all events held between January 1 and December 31, 2012.

Competitors must wear World Taekwondo Federation (WTF) approved uniforms.

SECTION 2: COMPETITION FORMAT

The World Taekwondo Poomsae Championships utilizes the following cut-off system:

In a division of 21 or more competitors, competition begins with a preliminary round.

In a division of 9-20 competitors, competitors proceed to the semi-final round.

In a division of 8 or less competitors, competitors proceed to the final round.

Preliminary Round: Competitors perform two of the 1st Compulsory Poomsae. The competitors with scores in the top half of the group proceed to the semi-final round.

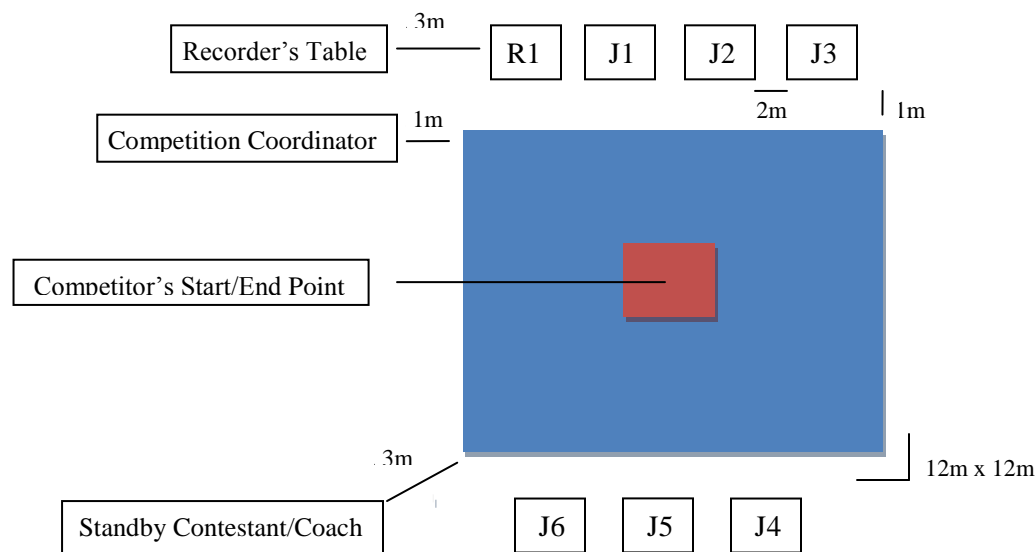

Semi-Final Round: Competitors perform two of the 2nd Compulsory Poomsae. The competitors with scores in the top eight of the group proceed to the final round.

Final Round: Competitors perform two of the 2nd Compulsory Poomsae. The top four competitors are awarded 1st, 2nd, 3rd, and 3rd place.

In the case of a tie, the winner is the competitor with the highest presentation score. If the competitors are still tied, they perform a poomsae different than the previous two scored poomsae. If the competitors are still tied, all scores received during the competition are compared.

USA Taekwondo may use a modified version of the WTF competition format and/or various formats, including selection camps, to select the US National Taekwondo Poomsae Team.

Competition Ring Area

Duration of contest of all divisions: 1-2 minutes

Break time between poomsae: 1 minute

SECTION 3: EVENT PROCEDURE

Competitors report to the holding area in accordance with the event schedule. In the holding area, competitors are free to warm-up and practice before their divisions are assembled and escorted to their assigned rings. When called by name, each competitor, pair, or team, in turn, bows to enter the ring, walks to the center of the ring, and responds appropriately to the following competition coordinator commands:

Charyeot: stand at attention

Kyeong-rye: bow

Joonbi: stand in the ready position

Shijak: begin performing the poomsae

Baro: return to the joon bi position

Charyeot: stand at attention

Kyeong-rye: bow

Scoring Criteria: Competitors receive two scores, one for accuracy and one for presentation. The accuracy score range is 0.0-5.0, is worth 50% of the total, and is given as the competitor performs the poomsae. The score is given based on the competitor's ability to perform the accuracy of the basic movements: start/end point, progression of each movement, path of motion, proper targeting, hand/fist rotation, and total movement associated with each poom combination.

The presentation score range is 2.5-5.0, is worth 50%, and is scored after the completion of the poomsae. 30% is based on mastery: volume of movement, balance, power and speed. 20% is based on presentation: coordination of rhythm/tempo, softness/power, and expression of ki (energetic expression).

The lowest and highest from each of the two sets of judges' scores are discarded. Then, the two sets are added together to come up with averages for each competitor in the two categories, accuracy and presentation. These two scores are added together to find the overall total for each poomsae.

This process is repeated for the second poomsae. Finally, the two scores are averaged together for the competitor's overall score.

SECTION 4: GENERAL TECHNICAL GUIDELINES

All poomsae begin and end on, or within one foot length of, the same spot.

All blocks begin with the blocking arm on the outside of the other arm.

Outside to inside hand techniques (e.g., middle block, reverse knife hand strike) end at the centerline of the body.

Inside to outside hand techniques (e.g., outside block, single and double knife hand block) end at the outer edge of the body.

Back fist strikes (forward back fist, side back fist) begin with the striking hand on the inside of the other arm.

The competitor is free to choose the non-blocking/striking arm motion but is advised to maintain consistency. For example, a competitor who extends the left arm in the position of a straight punch to the centerline of the body just prior to executing a right middle block should make the same motion prior to every middle block.

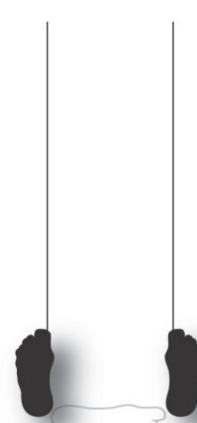

All kicks should be executed toward the head unless another target is specifically defined (e.g., the low side kicks in Koryo, or the jump front kicks in Taegeuk 8). Kicks must include: a chamber, full extension, and retraction as well as proper rotation of the supporting foot, leg, and hips.

Stances fall into two height level categories, those with straight legs as in walking stance, and those with bent legs as in horse riding stance. Transitions between movements should be on the balls of the feet. Feet should glide, not drag, across the surface of the mat. Stance and hand technique execution should be complete at the same moment.
